

## Notice to All Lakeshore Property Owners:

Beginning on Monday, September 29, Lake Restoration will be using Big Swan Lake Public Water Access to conduct a phosphorus reduction treatment on Big Swan Lake. This treatment will be applied offshore to the main basin of Big Swan Lake. This project has been coordinated with help and approval from the state, county, lake improvement district, lake association, MPCA, local DNR offices, and partners to drive water quality improvement for Big Swan Lake.

### Important notes:

- The Big Swan Lake Public Water Access will remain **open** for all public access and use.
- Be advised; there will be large equipment at the public access including storage tanks and application barge.
- Application work will be ongoing for multiple weeks and will be limited to Monday through Friday.
- No commercial application activity will occur on Saturdays and Sundays.
